Stainless Steel Couplers Now Available from Foster Manufacturing

Foster Manufacturing recently announced the immediate availability of their ARO 210 and ¼ inch Schrader Standard interchange couplers made from 303 Stainless Steel. Their stainless steel construction makes them suitable for use in environments where brass, steel or aluminum may not be compatible. Anticipated uses are for compressed air in petro-chemical, food & beverage, bio-medical or marine related environments.

For more information regarding Foster's stainless steel couplers, please contact a pneumatic specialist at AOP Technologies 800-282-2672 ext 6 or pneumatics@air-oil.com
